(isotretinoin) | I took it for a few months and as I already had some joint problems due to osteo arthritis and pain with same ,I noticed it was slowly getting worse.I saw my GP who told me that I was on such a low dosage 20mg that it could not possibly be Simvastatin to be the cause and it was my arthritic joints getting worse.I had sleep disturbance as well ,muscle pain in legs ,then my feet got so painful that on awaking in the morning I dreaded getting out of bed. |
